

A circular arrangement of recessed ceiling lights is shown from a top-down perspective. The lights are arranged in a ring, and the space between them is filled with numerous falling leaves, creating a dynamic and organic pattern. The leaves are illuminated from above, casting soft shadows and highlighting their textures. The overall scene is set against a dark background, emphasizing the light and movement of the leaves.

BESPOKE LIGHTING

Introduction

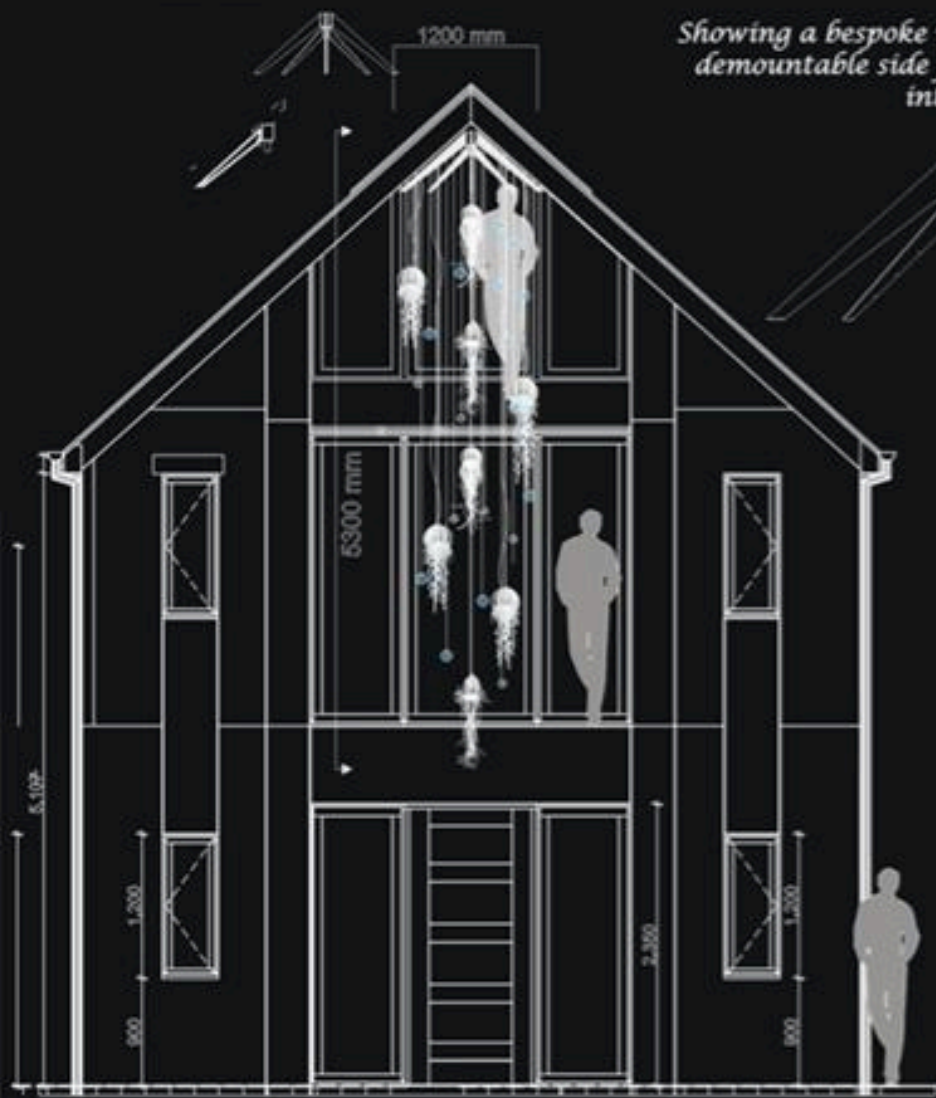

Our feature lighting is a unique and eye-catching way to enhance a variety of environments such as residential, suites, offices, restaurants, bars, shops and almost any other space you can imagine.

Our designers can help you construct your perfect lighting package and create bespoke products to suit any surroundings. Typically, our lighting products are produced by infusing glass with brushed aluminium, thus creating a stunning contemporary look. However, we have used materials such as leather and a variety of fabrics to complete a contemporary and modern look.

Bespoke lighting pendants and rings come with either white LEDs or in a variety of coloured LEDs. This enables you to have a variation of lighting options.

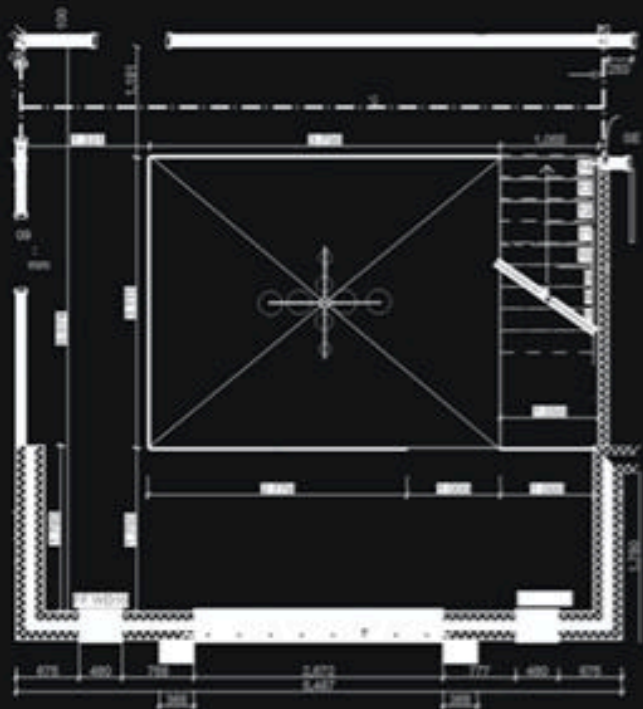

Showing a bespoke white steel arrangement with demountable side plates allowing full access to interior wiring

Showing an installation incorporating 8 Jellyfish lights and around 17 solid acrylic balls. Featuring 4 large Medusa with glass tentacles and 4 Hydra Jellyfish with fibre optic tentacles. All are hanging from a bespoke steel fitting, finished in semi gloss white, hanging from existing fixing point.
